DETAILED ACTION

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Bernard H. Browne, Jr. on January 5, 2004 (see the attached interview summary).

In the claims amended on December 17, 2003: Cancel claim 15.

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance: Regarding independent claims 1 and 3, the prior art does not show (or suggest) the combination of:

- presenting on a computer display the sequence of computer keyboard keys to be pressed to activate a correct sequence of musical notes sounds
- a storage means for storing plural data sets having all single musical note computer keyboard designations from an all inclusive sample music score covering each possible musical note tied in the database to

Art Unit: 2837

recorded single musical notes form the actual sounds of a plurality of all known musical instruments

- a storage means for storing a plurality of data sets for a plurality of musical songs in which musical score symbols are related in the database to computer keyboard keys
- display means for highlighting the particular part of the music instrument selected that corresponds to the current note of the music score
- and a sound pickup means

Regarding claim 2, the prior art does not show a means to record, modify, and combine the sound amplitude and frequency transformation where the frequency transformation operation permits generation of new sounds in frequency bands not generated in the original recordings nor a process for generating a display showing frequency spectrums, superimposed equalizer settings, frequency transformation settings, frequency spectrum amplitudes as a result of equalizer and frequency transformation inputs.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Response to Arguments

Regarding the New Matter rejection of October 4, 2001, the applicant has successfully shown (in the Amendment After Final, January 15, 2002) that no new matter has been entered in this application. The examiner has found that the added text is addressed to material already disclosed in the drawings. Therefore, the new matter rejection is hereby rescinded.
